WILSON COMMUNITY COLLEGE

EXECUTIVE SUMMARY

DECEMBER 2021

The Economic Value of Wilson Community College

.ıl' Emsi | 🛟 burningglass

WILSON COMMUNITY COLLEGE (WCC) creates value in many ways. The college plays a key role in helping students increase their employability and achieve their individual potential. The college retains students in the county, generating new dollars and opportunities for Wilson County. WCC provides students with the education, training, and skills they need to have fulfilling and prosperous careers. Furthermore, WCC is a place for students to meet new people, increase their self-confidence, and promote their overall health and well-being.

WCC influences both the lives of its students and the county economy. The college supports a variety of industries in Wilson County, serves county businesses, and benefits society as a whole in North Carolina from an expanded economy and improved quality of life. Additionally, the benefits created by WCC extend to the state and local government through increased tax revenues and public sector savings.

This study measures the economic impacts created by WCC on the business community and the benefits the college generates in return for the investments made by its key stakeholder groups—students, taxpayers, and society. The following two analyses are presented:

Economic impact analysis

Investment analysis

ਤੱ੍ਰਿ

All results reflect employee, student, and financial data, provided by the college, for fiscal year (FY) 2019-20. Impacts on the Wilson County economy are reported under the economic impact analysis and are measured in terms of added income. The returns on investment to students, taxpayers, and society in North Carolina are reported under the investment analysis.

WILSON COUNTY, NC

WCC influences both the **lives of its students** and the **county economy**.

WCC promotes economic growth in Wilson County through its direct expenditures and the resulting expenditures of students and county businesses. The college serves as an employer and buyer of goods and services for its day-today operations. The college's activities retain students in Wilson County, whose expenditures benefit county vendors. In addition, WCC is a primary source of higher education to Wilson County residents and a supplier of trained workers to county industries, enhancing overall productivity in the county workforce.

Operations spending impact

WCC adds economic value to Wilson County as an employer of county residents and a large-scale buyer of goods and services. In FY 2019-20, the college employed 333 full-time and part-time faculty

and staff, 59% of whom lived in Wilson County. Total payroll at WCC was \$11.3 million, much of which was spent in the county for groceries, mortgage and rent payments, dining out, and other household expenses. In addition, the college spent \$7.2 million on day-to-day expenses related to facilities, supplies, and professional services.

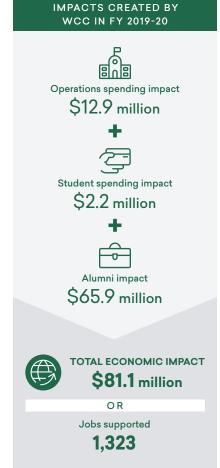

WCC's day-to-day operations spending added \$12.9 million in income to the county during the analysis year. This figure represents the college's payroll, the multiplier effects generated by the in-county spending of the college and its employees, and a downward adjustment to account for funding that the college received from county sources. The \$12.9 million in added income is equivalent to supporting 336 jobs in the county.

Student spending impact

Some in-county students, referred to as retained students, would have left Wilson County if not for the existence of WCC. While attending the college, these retained students spent money on groceries,

accommodation, transportation, and other household expenses. This spending generated \$2.2 million in added income for the county economy in FY 2019-20, which supported 61 jobs in Wilson County.

Alumni impact

The education and training WCC provides for county residents has the greatest impact. Since its establishment, students have studied at WCC and entered the county workforce with greater knowledge and

new skills. Today, thousands of former WCC students are employed in Wilson County. As a result of their education from WCC, the students receive higher earnings and increase the productivity of the businesses that employ them. In FY 2019-20, WCC alumni generated \$65.9 million in added income for the county economy, which is equivalent to supporting 926 jobs.

Total impact

WCC added \$81.1 million in income to the Wilson County economy during the analysis year, equal to the sum of the operations spending impact, the student spending impact, and the alumni impact. For context, the \$81.1 million impact was equal to approximately 1.8% of the total gross regional product (GRP) of Wilson County. This contribution that the college provided on its own was nearly as large as the entire Accommodation & Food Services industry in the county.

WCC's total impact can also be expressed in terms of jobs supported. The \$81.1 million impact supported 1,323 county jobs, using the jobs-to-sales ratios specific to each industry in the county. This means that one out of every 35 jobs in Wilson County is supported by the activities of WCC and its students. In addition, the \$81.1 million, or 1,323 supported jobs, stemmed from different industry sectors. Among non-education industry sectors, WCC's spending and alumni in the Health Care & Social Assistance industry sector supported 189 jobs in FY 2019-20. If the college did not exist, these impacts would not have been generated in Wilson County.

WCC IMPACTS BY INDUSTRY (JOBS SUPPORTED)

Health Care & Social Assistance

Government, Non-Education

Accommodation & Food Services

85

One out of every 35 jobs in Wilson County is supported by the activities of WCC and its students.

INVESTMENT ANALYSIS

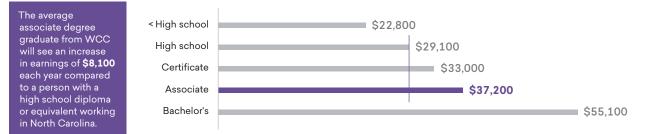

An investment analysis evaluates the costs associated with a proposed venture against its expected benefits. If the benefits outweigh the costs, then the investment is financially worthwhile. The analysis presented here considers WCC as an investment from the perspectives of students, taxpayers, and society in North Carolina.

Student perspective

In FY 2019-20, WCC served 2,524 credit and 3,845 non-credit students. In order to attend the college, the students paid for tuition, fees, books, and supplies. They also took out loans and will incur interest on those loans. Additionally, students gave up money they would have otherwise earned had they been working instead of attending college. The total investment made by WCC's students in FY 2019-20 amounted to a present value of \$15.8 million, equal to \$3.5 million in out-of-pocket expenses (including future principal and interest on student loans) and \$12.3 million in forgone time and money.

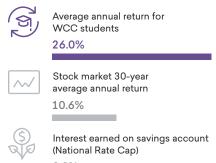

In return for their investment, WCC's students will receive a stream of higher future earnings that will continue to grow throughout their working lives. For example, the average WCC associate degree graduate from FY 2019-20 will see annual earnings that are \$8,100 higher than a person with a high school diploma or equivalent working in North Carolina. Over a working lifetime, the benefits of the associate degree over a high school diploma will amount to an undiscounted value of \$299.7 thousand in higher earnings per graduate. The present value of the cumulative higher future earnings that WCC's FY 2019-20 students will receive over their working careers is \$83.3 million.

The students' benefit-cost ratio is 5.3. In other words, for every dollar students invest in WCC in the form of out-of-pocket expenses and forgone time and money, they will receive a cumulative value of \$5.30 in higher future earnings.

STUDENTS SEE A HIGH RATE OF RETURN FOR THEIR INVESTMENT IN WCC

0.8%

Source: Forbes' S&P 500, 1991-2020. FDIC.gov, 6-2021.

Annually, the students' investment in WCC has an average annual internal rate of return of 26.0%, which is impressive compared to the U.S. stock market's 30-year average rate of return of 10.6%.

Taxpayer perspective

WCC generates more in tax revenue than it takes. These benefits to taxpayers consist primarily of taxes that the state and local government will collect from the added revenue created in the state. As WCC students will earn more, they will make higher tax payments throughout their

working lives. Students' employers will also make higher tax payments as they increase their output and purchases of goods and services. By the end of the FY 2019-20 students' working lives, the state and local government will have collected a present value of \$25.5 million in added taxes.

Benefits to taxpayers will also consist of savings generated by the improved lifestyles of WCC students and the corresponding reduced government services. Education

invested in WCC, taxpayers will receive a cumulative value of \$2.10 over the course of the students' working lives.

For every dollar of public money

is statistically correlated with a variety of lifestyle changes. The educations that WCC students receive will generate savings in three main categories: 1) healthcare, 2) justice system, and 3) income assistance. Improved health will lower students' demand for national health care services. In addition, costs related to the justice system will decrease. WCC students will be more employable, so their reduced demand for income assistance such as welfare and unemployment benefits will benefit taxpayers. For a list of study references, contact the college for a copy of the main report. Altogether, the present value of the benefits associated with a WCC education will generate \$2 million in savings to state and local taxpayers.

Total taxpayer benefits amount to \$27.5 million, the present value sum of the added taxes and public sector savings. Taxpayer costs are \$12.9 million, equal to the amount of state and local government funding WCC received in FY 2019-20. These benefits and costs yield a benefit-cost ratio of 2.1. This means that for every dollar of public money invested in WCC in FY 2019-20, taxpayers will receive a cumulative present value of \$2.10 over the course of the students' working lives. The average annual internal rate of return for taxpayers is 6.5%, which compares favorably to other long-term investments in the public and private sectors.

Social perspective

Society as a whole in North Carolina benefits from the presence of WCC in two major ways. Primarily, society benefits from an increased economic base in the state. This is attributed to the added income

from students' increased lifetime earnings (added student income) and increased business output (added business income), which raise economic prosperity in North Carolina.

Benefits to society also consist of the savings generated by the improved lifestyles of WCC students. As discussed in the previous section, education is statistically correlated with a variety of lifestyle changes that generate social savings. Note that these costs are avoided by the consumers but are distinct from the costs avoided by the taxpayers outlined above. Healthcare savings include avoided medical costs associated with smoking, alcohol dependence, obesity, drug abuse, and depression. Justice system savings include avoided costs to the government and society due to less judicial activity. Income assistance savings include reduced welfare and unemployment claims. For a list of study references, contact the college for a copy of the main report.

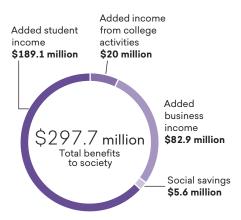

Altogether, the social benefits of WCC equal a present value of \$297.7 million. These benefits include \$189.1 million in added student income, \$82.9 million in added business income, \$20.0 million in added income from college activities, as well as \$5.6 million in social savings related to health, crime, and income assistance in North Carolina. People in North Carolina invested a present value total of \$33.9 million in WCC in FY 2019-20. The cost includes all the college and student costs.

The benefit-cost ratio for society is 8.8, equal to the \$297.7 million in benefits divided by the \$33.9 million in costs. In other words, for every dollar invested in WCC, people in North Carolina will receive a cumulative value of \$8.80 in benefits. The benefits of this investment will occur for as long as WCC's FY 2019-20 students remain employed in the state workforce.

Summary of investment analysis results

The results of the analysis demonstrate that WCC is a strong investment for all three major stakeholder groups—students, taxpayers, and society. As shown, students receive a great return for their investments in a WCC education. At the same time, taxpayers' investment in WCC returns more to government budgets than it costs and creates a wide range of social benefits throughout North Carolina.

SOCIAL BENEFITS IN NORTH CAROLINA FROM WCC

* The rate of return is not reported for the social perspective because the beneficiaries of the investment are not necessarily the same as the original investors.

CONCLUSION

The results of this study demonstrate that WCC creates value from multiple perspectives. The college benefits county businesses by increasing consumer spending in the county and supplying a steady flow of qualified, trained workers to the workforce. WCC enriches the lives of students by raising their lifetime earnings and helping them achieve their individual potential. The college benefits state and local taxpayers through increased tax receipts and a reduced demand for government-supported social services. Finally, WCC benefits society as a whole in North Carolina by creating a more prosperous economy and generating a variety of savings through the improved lifestyles of students.

About the study

Data and assumptions used in the study are based on several sources, including the FY 2019-20 academic and financial reports from WCC, industry and employment data from the U.S. Bureau of Labor Statistics and U.S. Census Bureau, outputs of Emsi Burning Glass's Multi-Regional Social Accounting Matrix model, and a variety of studies and surveys relating education to social behavior. The study applies a conservative methodology and follows standard practice using only the most recognized indicators of economic impact and investment effectiveness. For a full description of the data and approach used in the study, please contact the college for a copy of the main report. The results of this study demonstrate that WCC creates value from **multiple perspectives.**
